

FUCK Token

Built on the Ethereum Blockchain

Welcome to a world where everyone gives a FUCK. Dozens of ICOs are popping up daily, all with empty promises of how they will change the world. They spew enticing buzzwords and confusing rhetoric just to make you invest in their idea. With FUCK tokens, we present a unique opportunity to express how you *really* feel.

In today's society, we have an epidemic where millions of people have **no fucks to give**. With our ERC-20 FUCK token we have solved the "lack of FUCKs" problem. Tip your friends 0.001 FUCKs, or 1 FUCK, it doesn't matter how many FUCKs you give. All that matters is you are contributing something to society.

Cryptocurrencies are breaking down the barriers of society, revolutionizing currency as we know it. To have a bit of fun, we've created a novelty token called FUCK. You can think of this token as a video game credit, like World of Warcraft. FUCKs are not investments, rather they're tokens that you can use in any situation.

Vision

We envision an ecosystem where FUCKs are distributed through tips. You laughed at a shitpost on Reddit? Show them your appreciation by giving a FUCK. Your friend is sulking about his marital problems? Give him a FUCK or two and watch his smile brighten up. Being cyber-bullied for being a crypto nerd? Send them 10,000 digital, decentralized, middle fingers with FUCK token.

Tip Bot

We have developed a tip bot that can send FUCKs to anyone on Reddit, on any subreddit. By tipping FUCKs, you are not only contributing to the FUCK token ecosystem, you are indirectly exposing newcomers to the Ethereum network. Imagine a world where thousands of FUCKs are given every minute.

Tip Bot Platform

We are designing multiple custom tip bots for social media platforms. Currently, we plan on enabling tipping FUCKs on Reddit, Twitter, Twitch, Slack, Discord and Telegram. Our goal is to make tipping FUCKs a seamless and intuitive experience. Giving a novelty FUCK Token is a perfect way to introduce someone to cryptocurrencies. Our bot will automatically create a wallet for new users and provide detailed guides on how to easily tip others.

Tipping FUCKs can go both ways. Sometimes you really need to let someone know you don't give a FUCK. To show someone you really don't care, tip !NOFUCKS. This burns 3 FUCKs out of your balance.
